B&C OFFICIAL MEASURER

INSTRUCTIONS FOR MEASURING MUSKOX

All measurements must be made with a 1/4-inch wide flexible steel tape and adjustable calipers to the nearest one-eighth of an inch. Enter fractional figures in eighths, without reduction. Official measurements cannot be taken until horns have air dried for at least 60 days after the animal was killed.

- A. Greatest Spread** is measured between perpendiculars at a right angle to the center line of the skull.
- B. Tip to Tip Spread** is measured between tips of horns.
- C. Length of Horn** is measured along center of upper horn surface, staying within curve of horn as illustrated, to a point in line with tip. Attempt to free the connective tissue between the horns at the center of the boss to determine the lowest point of horn material on each side. Hook the tape under the lowest point of the horn and measure the length of horn, with the measurement line maintained in the center of the upper surface of horn following the converging lines to the horn tip.
- D-1. Width of Boss** is measured with calipers at greatest width of the boss, with measurement line forming a right angle with horn axis. It is often helpful to measure D-1 before C, marking the midpoint of the boss as the correct path of C.
- D-2-3-4. Divide measurement C** of longer horn by four. Starting at base, mark **both** horns at these quarters (even though the other horn is shorter). Then, using calipers, measure width of boss at D-2, making sure the measurement is at a right angle to horn axis and in line with the D-2 mark. Circumferences are then measured at D-3 and D-4, with measurements being taken at right angles to horn axis.

ENTRY AFFIDAVIT FOR ALL HUNTER-TAKEN TROPHIES

For the purpose of entry into the Boone and Crockett Club's® records, North American big game harvested by the use of the following methods or under the following conditions are ineligible:

- I. Spotting or herding game from the air, followed by landing in its vicinity for the purpose of pursuit and shooting;
- II. Herding or chasing with the aid of any motorized equipment;
- III. Use of electronic communication devices, artificial lighting, or electronic light intensifying devices;
- IV. Confined by artificial barriers, including escape-proof fenced enclosures;
- V. Transplanted for the purpose of commercial shooting;
- VI. By the use of traps or pharmaceuticals;
- VII. While swimming, helpless in deep snow, or helpless in any other natural or artificial medium;
- VIII. On another hunter's license;
- IX. Not in full compliance with the game laws or regulations of the federal government or of any state, province, territory, or tribal council on reservations or tribal lands;

I certify that the trophy scored on this chart was not taken in violation of the conditions listed above. In signing this statement, I understand that if the information provided on this entry is found to be misrepresented or fraudulent in any respect, it will not be accepted into the Awards Program and 1) all of my prior entries are subject to deletion from future editions of **Records of North American Big Game** 2) future entries may not be accepted.

FAIR CHASE, as defined by the Boone and Crockett Club®, is the ethical, sportsmanlike and lawful pursuit and taking of any free-ranging wild, native North American big game animal in a manner that does not give the hunter an improper advantage over such game animals.

The Boone and Crockett Club® may exclude the entry of any animal that it deems to have been taken in an unethical manner or under conditions deemed inappropriate by the Club.
